Training

A rolling programme of mandatory training is essential to all our agency workers in areas such as Manual Handling, Health & Safety and Basic Life Support. This is why we make sure all our Agency workers are up to date with all Mandatory training and continue to develop their knowledge of the health sector through individual and group seminars.

We also encourage personal development, with all our nurses continuing their professional development (CPD) and post registration education by participating in all relevant upcoming training courses that are available to each individual Nurse and HCA. With our main aim being that we continue to provide our clients with knowledgeable and professional nurses
